

ORANGEHRM WEB APPLICATION TESTING PROJECT

Software Quality Assurance & Manual Testing

Presented By: Piyush Bhagchandani

Projected Delivery: May 2026

System Introduction

OrangeHRM is a comprehensive Human Resource Management System. It enables organizations to manage employee lifecycles efficiently through a centralized digital portal.

Core Testing Objectives

Functional

Verify that all features perform exactly as per the business requirements and user stories.

Usability

Ensure the interface provides a smooth, intuitive workflow for HR staff and employees.

Compatibility

Confirm stability across different browser engines (Blink, Gecko, WebKit) and OS platforms.

Regression

Assure that recent changes or fixes do not negatively impact existing system logic.

Defect Mgmt

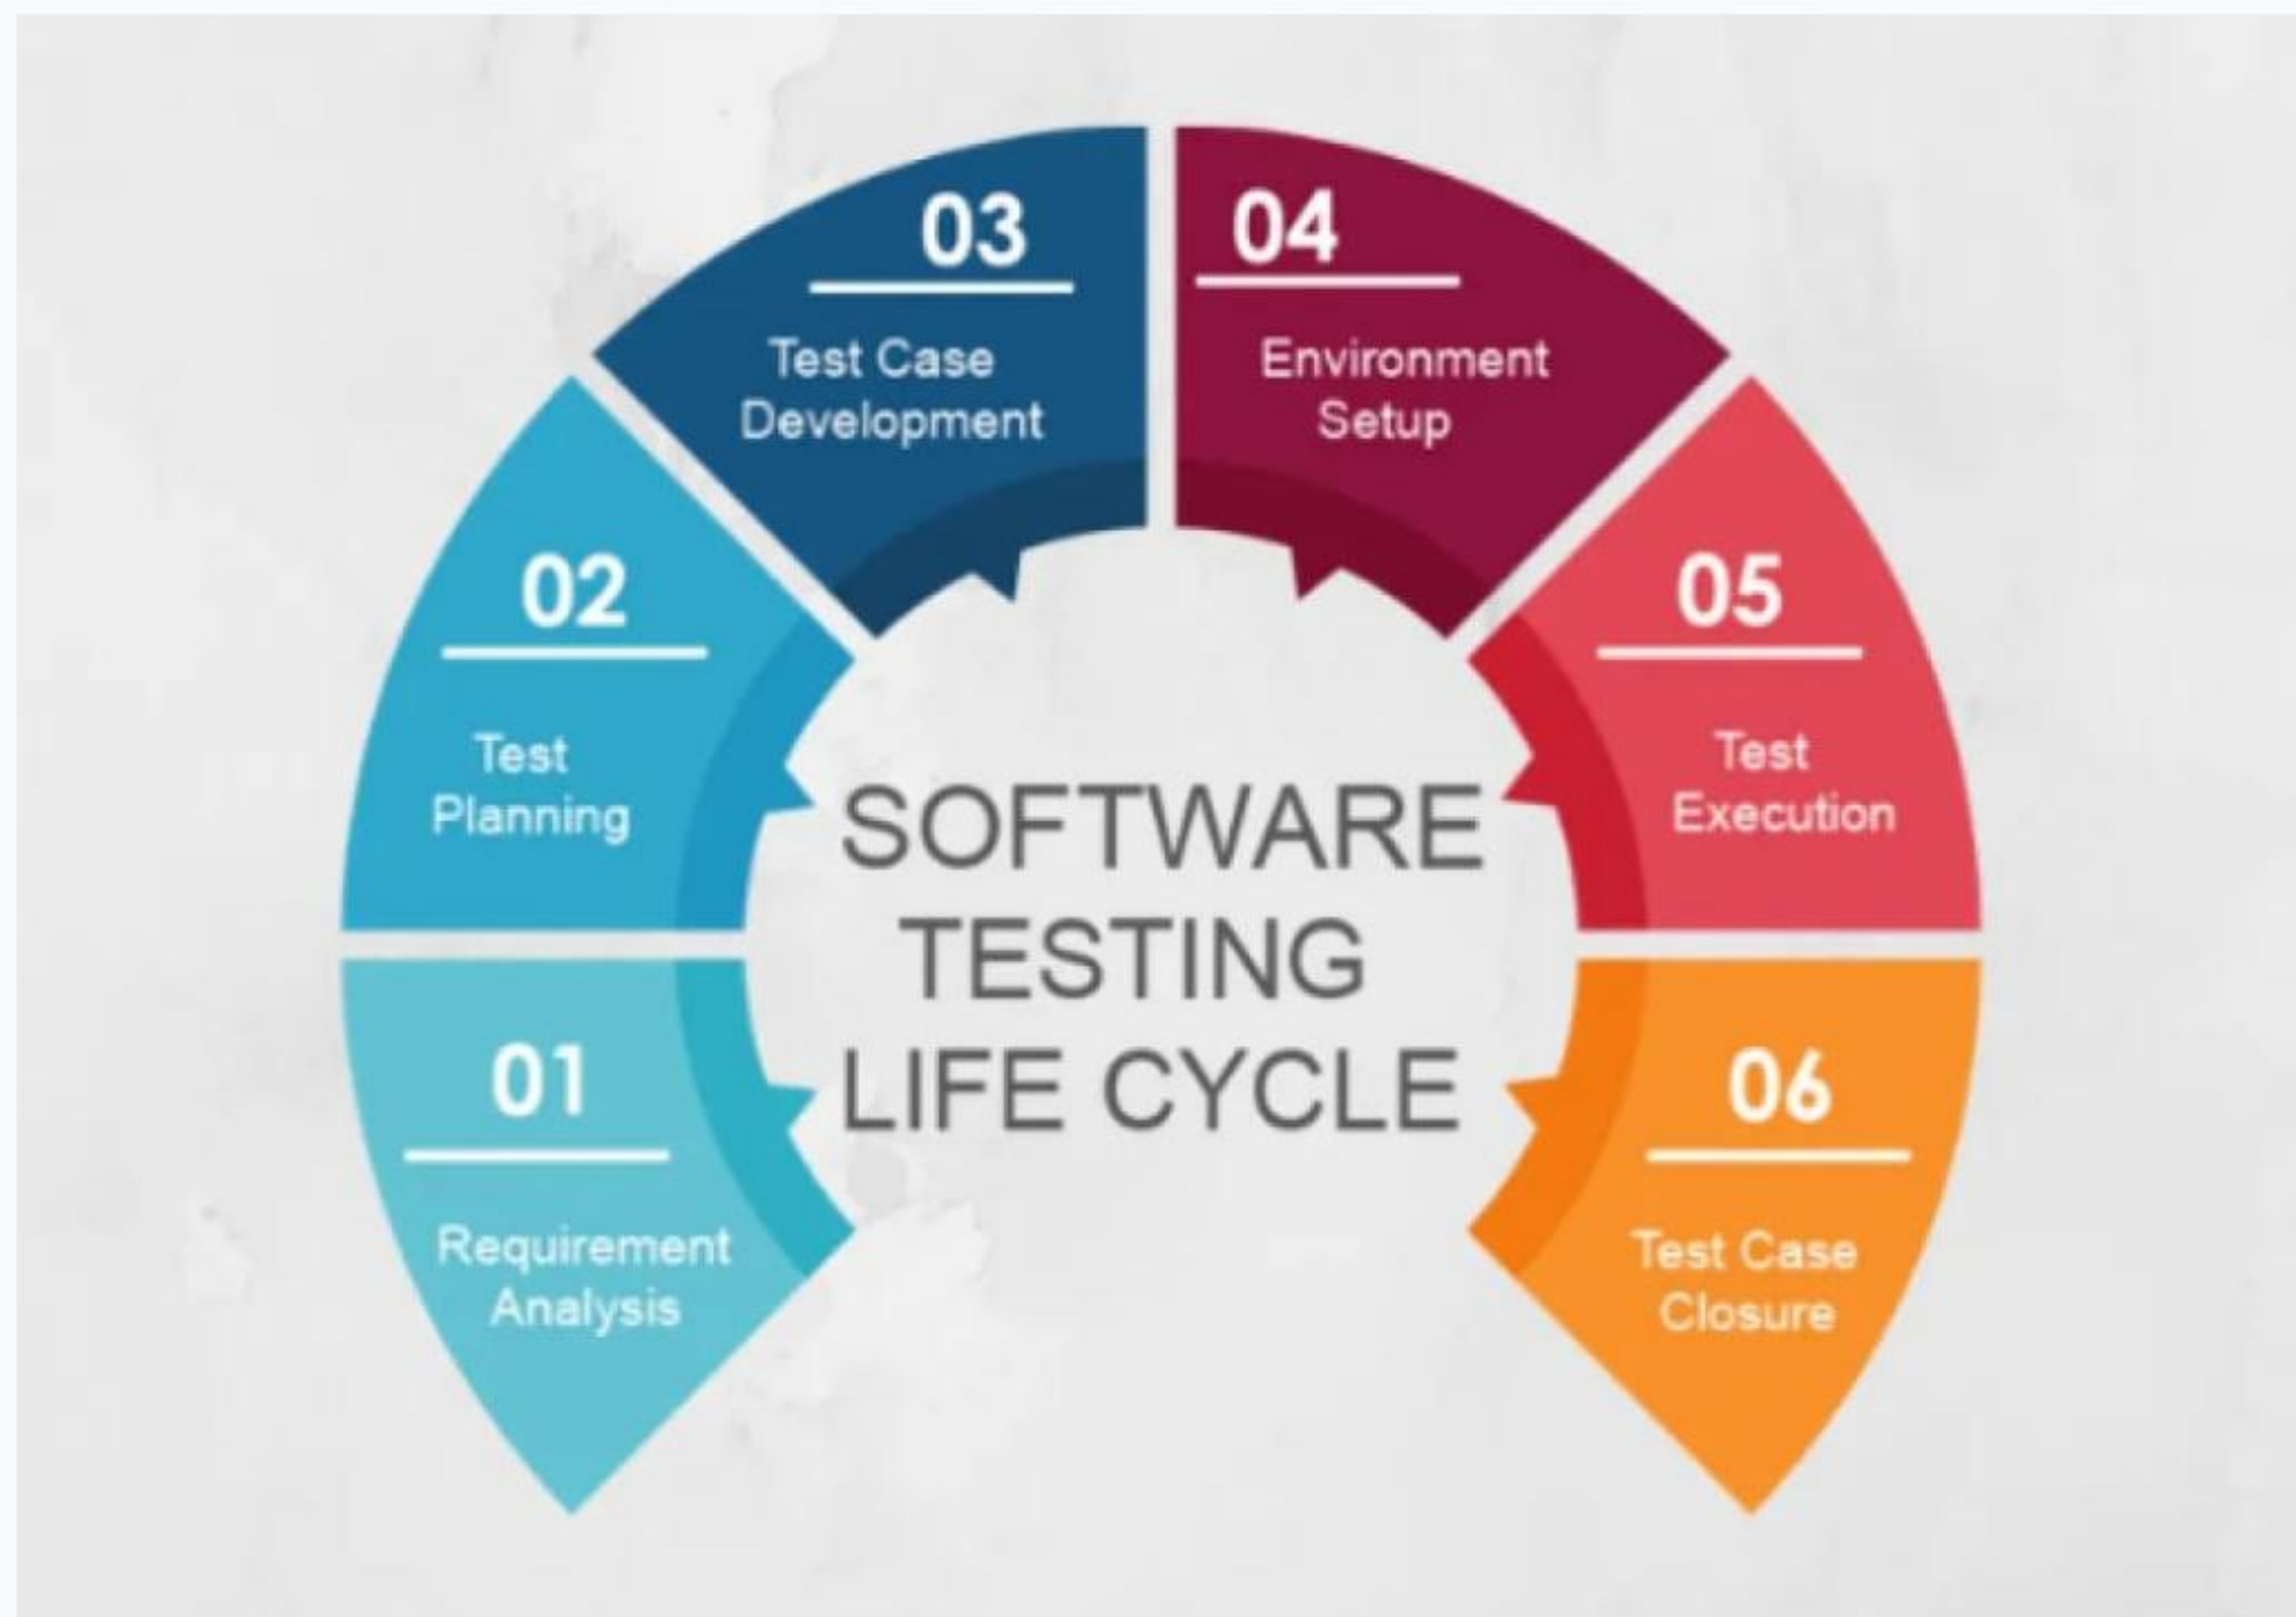

Discover, categorize, and track all software anomalies through to resolution.

System Integrity

Validate that the PIM and Admin modules maintain high data consistency and security.

Testing Workflow Strategy

Strategy Framework

We adopt a risk-based **Manual Testing** approach, following the standard Software Testing Life Cycle (STLC) to maximize coverage.

- **Entry:** Validated BRD & User Stories.
- **Focus:** Positive and Negative test scenarios.
- **Exit:** 100% execution of high-risk cases.

Resource Allocation

Name	Role	Core Responsibilities
Piyush Bhagchandani	Manual Tester	Requirement analysis, Scenario mapping, Test case authoring, Execution, and Defect logging in Jira.
QA Management	Supervisor	Resource planning, Strategy sign-off, and Final Test Summary Report (TSR) review.

Execution Timeline

Phase	Duration	Target Dates	Status
Requirement Analysis	4 Days	May 01 - May 04	Completed
Test Planning	3 Days	May 05 - May 07	Completed
Test Case Writing	7 Days	May 08 - May 14	Completed
Execution & Reporting	10 Days	May 15 - May 24	In Progress
Test Closure	4 Days	May 25 - May 28	Planned

Quality Artifacts

Deliverable	Primary Owner	Completion Target
Master Test Plan (MTP)	Piyush B.	May 07, 2026
Manual Test Cases	Piyush B.	May 14, 2026
RTM Matrix	Piyush B.	May 14, 2026
Defect Reports (Jira)	Piyush B.	May 24, 2026
Test Summary Report	Piyush B.	May 28, 2026

Quality Gates: Analysis & Planning

Requirement Analysis

Entry: Functional requirements documentation received from the PO.

Exit: Requirements reviewed; 100% clarification on business logic achieved.

Test Planning

Entry: Finalized requirements and environment access available.

Exit: Test Plan approved; Tooling and team readiness confirmed.

Quality Gates: Execution & Closure

Test Execution

Entry: Approved Test Cases and stable build in the QA environment.

Exit: All test cycles run; High-severity bugs logged and retested.

Test Closure

Entry: Testing cycles concluded and final defect summary available.

Exit: Test Summary Report signed off; Quality Gate passed.

Test Environment Configuration

OS Matrix

Windows 10 Pro
Windows 11 Home/Ent

Browser Stack

Google Chrome (Stable)
MS Edge & Firefox

App Type

Web Application
(Manual Testing Focus)

Technology & Testing Stack

Excel/Sheets

Test Documentation

Atlassian Jira

Defect Lifecycle

XMind Tool

Project Presentation

THANK YOU!

OrangeHRM Testing Project | QA Certification

The OrangeHRM manual testing project successfully validated critical business processes including PIM, Leave, and Time Management. All identified defects were systematically tracked to ensure a high-quality product release.
